SUBJECT INDEX—ALLERGY ABSTRACTS*

A

Acetylcholine, inhibition of effects by lysolecithin, *87*

Acetylene welding, urticaria and asthma caused by, *83*

ACTH and hydrocortisone, comparison of pharmacologic doses on various biologic parameters, *7*

Addison's disease, adrenal antibodies demonstrated in, *79*

Adjuvant-antigen relationships in the production of experimental allergic encephalomyelitis in guinea pig, *56*
  effect of normal spleen cells in sensitization of guinea pigs, *8*

Aerosol ergotamine tartrate, use in treatment of migraine, *15*

Agranulocytosis, oxyphenbutazone, as cause, *79*

Airborne pollen, survey in Jerusalem, *67*

Allergic and anaphylactic reactions, role of incomplete antibody in mechanism, *61*
  encephalomyelitis in mouse, critical relationships between constituents of antigen-adjuvant emulsion, *40*
  tattoo granuloma, mercuric sulfide as cause, *19*

Amyloid tumor, asthma caused by, *18*

Anabolic steroids, increase in height from, in steroid-stunted children, *82*

Anaphylactic challenge, effect on vitamin B_1 levels, *40*
  reaction, chymotrypsin injections as cause, *5*
  sensitivity, basophil degranulation as major factor in, *13*
  shock, intravenous injection of thiamine hydrochloride as cause, *73*
  slow-reacting substance, effect of lysolecithin on, *87*

Anaphylactoid reaction, following oral administration of penicillin, *21*
    nitrofurantoin as cause, *64*

Anaphylaxis, comparison of *B. pertussis* cells and Freund's adjuvant, in production, *94*
  cutaneous, histamine in, *93*
    histologic changes of spleen in, *75*
    protective effect of phenylbutazone on, in guinea pigs, *14*
    role of fibrinolysin and vasoactive polypeptide systems in, *62*

Anaphylaxis—Cont'd
  and histamine shock, serum chloride fluctuation following, *46*
  local, demonstration of, with nonpersisting dye, *46*

Anemia, streptomycin therapy as a cause of hemolytic type, *23*

Anergy in Hodgkin's disease and other malignancies, *59*

Antibiotics, chronic bronchitis treated with, *38*

Antibodies, gastric, occurrence in pernicious anemia, *60*
  to penicillin in maternal and cord bloods, *7*
  to ragweed, comparison of methods of testing for, *13*
  significance in psoriasis, *50*
  spermagglutinating, presence in antihuman prostate sera, *86*
  variation in size depending on recall phenomenon, *44*
  variation in sizes, produced by human neonates, *44*
  various types, to ragweed antigen, *10*

Antibody formation, route of administration as factor in, *91*
  forming capacity in mouse, suppressive effect of thymectomy on, *75*
  response, following booster dose of tetanus toxoid, *2*

Antigen-adjuvant emulsion, relationship between constituents and production of allergic encephalomyelitis in mouse, *40*
  relation between molecular weight and ability to elicit passive cutaneous anaphylaxis, *11*

Antigen-antibody reactions in avascular cornea of rabbit, *30*
    microspot test with cellulose acetate membranes, *48*

Antihistamines, photoallergic reactions caused by, *52*

Antinuclear factors, in chronic discoid lupus erythematosus, *51*

Arthus phenomenon, proteolytic mechanisms in recurrences, induced by thiol compounds, *31*

Antiplasmin, significance in allergic diseases, *45*

Asthma, acetylene welding as cause, *83*
  aerosol steroid therapy in, *66*
  amyloid tumor as cause, *18*

*January—February, pp. *1-16*; March—April, pp. *17-32*; May—June, pp. *33-48*; July—August, pp. *49-64*; September—October, pp. *65-80*; November—December, pp. *81-96*.

Asthma—Cont'd
classification of difference between nasal and bronchial type, *35*
death without status asthmaticus in schizophrenics, *82*
gamma globulin in treatment, *67*
hypertension and renal tuberculosis associated with, *68*
influence of testosterone on, *67*
lack of benefit from isoprophenamine or methapyrilene (Histadyl) in children, *3*
lack of effect of air pressure on, *18*
prognostic guides in, *34*
shedding of mucosa of bronchial tree in, *34*
toluene di-isocyanate (T.D.I.) as cause, *71*
as excitant of symptoms resembling, *80*
use of Quibron in, *18*
Autoimmune disease, and chronic biologic false-positive test for syphilis, *26*
evidence of, in pernicious anemia, *60*
immunoconglutinin levels in, *45*
neuritis in association with, *11*
role in Addison's disease, *79*
Autoimmune muscular dystrophy, production in mice and guinea pigs, *29*
Autoimmunity, infantile cirrhosis and, *11*
in pernicious and iron deficiency anemias, *73*
relationship of thyroid disease to, *30*
systemic connective tissue disease and lymphoma in, *54*
Autosensitization to DNA manifested by cutaneous hemorrhage, *25*

B

B. pertussis cells, adjuvant effect in anaphylaxis, *94*
Bacteriophage, effectiveness as antigen in neonates, *45*
Basophil degranulation, anaphylactic sensitivity detected by, *13*
penicillin sensitivity detected by, *59*
Basophil leukocyte, response in physical and nonphysical urticaria, *39*
technique for preservation and study, *24*
Basophilic leukopenia in different forms of urticaria, *50*
Blindness, triple antigen as cause, *63*
Blood platelets, antigenic structure and histocompatibility with skin antigens, *43*
common antigen with skin, *43*
Bradykinin, eosinophils and, *85*
ineffectiveness of oxyphenbutazone (Tandearil) in treatment, *3*
inhibition of effect by lysolecithin, *87*
treatment of potentially fatal, *2*
Bronchial diameters, changes in caliber during respiration, *53*
Bronchitis, ampicillin in treatment, *38*

C

Canine hypersensitivity to ragweed, spontaneous, *74*
Carcinogenesis, relationship to induced specific contact-type sensitization in guinea pigs, *90*
Cataract, association with systemic corticosteroid therapy, *22*
influence of steroids on production, *96*
Cellular transfer of delayed type hypersensitivity to procaine, *68*
Cellulose acetate membranes, microspot antigen-antibody tests with, *48*
Chickens, immunologic role of lymphoid organs in, *58*
Chlorpropamide, photosensitivity to, *20*
Chromium, contact sensitivity to, in guinea pigs, *95*
experimental production of circulating antibodies to, *12*
ion, inactivation in allergic eczematous dermatitis, *19*
Chronic discoid lupus erythematosus (C.D. L.E.), antinuclear factors in, *51*
relationship to S.L.E., *51*
Chymotrypsin, anaphylactic reaction to, *5*
Cladosporium spores, diurnal variation in, *63*
Cold urticaria, histamine treatment, *4*
Complement titer, in eczema, *35*
Connective tissue disease, lymphoma associated with, *54*
Contact dermatitis, chlorpromazine as cause, *69*
Scotchgard as cause, *70*
sensitization, with chromium compounds, *95*
Cornea, avascular, as the seat of antigen-antibody reactions in rabbits, *30*
host reaction to homografts, *46*
hypersensitivity in, *47*
Corneal grafts, immunochemical alteration by lyophilization, *42*
Corticosteroid growth suppression, effect of methandienone on, *68*
Corticosteroids, cataract formation in association with, *22*
liberation of histamine from tissues by, *23*
Cortisone, effect on experimental peptic ulcer, *64*
glaucoma caused by, *47*
C-reactive protein determinations, in eczema, *35*
Cystic fibrosis, effect of mechanical percussion on bronchial secretions in, *3*

D

Delayed contact type sensitization, induction of, to methylcholanthrene in guinea pigs, *90*
Delayed hypersensitivity reactions, immunologic specificity, *55*
to procaine, cellular transfer, *68*
relationship to hyperreactivity to endotoxin, *89*

Dermatitis venenata, *Phacelia crenulata* (desert heliotrope) as cause, *70*
Desert heliotrope (*Phacelia crenulata*), dermatitis venenata caused by, *70*
DNA autosensitization, hemorrhagic cutaneous anaphylaxis caused by, *25*
Drug sensitivity, chlorpromazine as cause, *69*
and lupus erythematosus, *20*
Dust, physical characteristics, in indoor and outdoor locations, *16*

E

Eczema, complement titer, C-reactive protein, electrophoretic serum protein patterns in, *35*
solare, erythropoietic protoporphyria as cause, *51*
Eczematous dermatitis, allergic, inactivation of chromium ion in, *19*
Electrophoretic serum protein pattern studies in atopic dermatitis, *35*
Emphysema, influence of mechanical assistance to respiration on ventilatory response to carbon dioxide in, *24*
primary pulmonary, in young adults, *34*
Endotoxin, hyperreactivity to, in BCG-treated guinea pigs, *89*
Enzymatic dissolution of pulmonary secretions in cystic fibrosis of pancreas, *24*
Eosinophilia, experimental, eosinotactic influences of polysaccharides in, *57*
skin window used for demonstration of, in hypersensitivity reactions, *38*
tropical lung abscess as complication, *5*
Eosinophilic responses to antigen-antibody systems, specificity, *90*
Eosinophils, bradykinin and, *85*
phagocytosis-promoting substance present in, *76*
presence in granulomatous prostatitis, *80*
Erythropoietic protoporphyria, eczema solare associated with, *51*
Experimental "allergic" encephalomyelitis in guinea pig, adjuvant-antigen relationships in production, *56*
asthma, contractions of trachea and bronchi in, *83*
Eye, lens antigens in, *45*

F

False-positive test for syphilis and autoimmune disease, *26*
Familial Mediterranean fever, immunologic studies by agar gel diffusion technique in, *11*
Farmer's lung, *22, 60*
Fetal death due to administration of iodides during pregnancy, *63*
Fluorescent antiglobulin serum, use in study of megakaryocytes in idiopathic thrombocytopenic purpura (ITP), *25*
Food allergy, detection, *52*
Freund's adjuvant, anaphylactogenic effect in mice, *94*

G

Gamma globulin, asthma in children treated with, *67*
Glaucoma, cortisone as cause, *47*
Glomerulonephritis, ammoniated mercury ointment as cause, *21*
Goodpasture's syndrome, *53*
Grafts, corneal, immunochemical changes induced in, by lyophilization, *42*
Growth, influence of steroid therapy on, in asthma, *66*

H

Hemagglutinin antibodies in penicillin allergy, *83*
Hemolytic anemia, streptomycin as cause, *23*
Hemorrhagic cutaneous anaphylaxis due to autosensitization to DNA, *25*
Heparin, dysesthesia pedis from, *48*
Histamine, effect of liberator on skin of patients with urticaria and eczema, *4*
efficacy in treatment of tic douloureux, *32*
inhibition of effects by lysolecithin, *87*
liberation from tissues by corticosteroids, *23*
shock, failure of phenylbutazone to protect against, in guinea pigs, *14*
treatment of cold urticaria with, *4*
Histaminuria, urticaria pigmentosa and, *54*
Hodgkin's disease, anergy in, *59*
delayed hypersensitivity in, *32*
Hydrocortisone and ACTH, comparison of pharmacologic doses on various biologic parameters, *7*
Hydroxysin (Atarax), effect on pruritus, *20*
Hypersensitivity, in cornea, *47*
delayed, thymectomy as a deterrent to development, *29*

I

Idiopathic thrombocytopenic purpura, allergic nature, *61*
fluorescence of megakaryocytes stained with fluorescent antiglobulin in, *25*
Immediate hypersensitivity reactions, immunologic specificity, *55*
Immunization, blindness following DPT, *63*
Immunoconglutinin levels, in multiple sclerosis, Hashimoto's disease, and rheumatoid arthritis, *45*
Immunoleukopenia, hypersensitivity to propylthiouracil as cause, *72*
Immunologic role of different lymphoid organs in chicken, *58*
unresponsiveness in adult guinea pigs, *77*

Incomplete antibody, role in mechanism of allergic and anaphylactic reactions, *61*
Infants, serum protein synthesis in, *28*
Insulin antibodies, BDB hemagglutination, *92*
presence in immunized rabbits and insulin treated patients, *92*
production in guinea pigs, *92*
antigenicity in guinea pigs, *92*
Intracutaneous reaction to extracts of *T. vaginalis*, *32*
Iodides, administration during pregnancy as cause of fetal death, *63*
Iron-deficiency anemia, autoimmunity demonstrated in, *73*

L

Lens antigens in ocular tissue, *45*
Leukoencephalopathy, autoimmune mechanism in, *54*
Lung abscess, occurrence in tropical eosinophilia, *5*
Lupus erythematosus, procainamide as cause, *20*
Lymph node cells, neonatal, rate of antibody production following transfer, *9*
transfer to neonatal recipient rabbits, *9*
Lymphoid organs, immunologic role in chicken, *58*
Lyophilization, immunochemical changes induced by, in corneal grafts, *42*
Lysolecithin, inhibitory effect on smooth muscle–stimulating activity of histamine, acetylcholine, 5-hydroxytryptamine, anaphylactic slow-reacting substance, and bradykinin, *87*

M

Malignancy, anergy in, *59*
Mango tree allergy, *36*
Mastocytosis, histamine metabolism in, *54*
Match test, measure of ventilatory function, *6*
Megakaryocytes, studies by means of fluorescent antiglobulin serum of individuals with acute and chronic idiopathic thrombocytopenic purpura, *25*
Meningitis and pancreatitis, sulfamethizole as cause, *37*
Mercuric sulfide–cinnabar as cause of allergic granuloma reaction, *19*
Methandienone, effects in long-term corticosteroid therapy, *68*
Methylcholanthrene, a carcinogen, induction of contact type sensitization to, in guinea pigs, *90*
Methysergide, failure to influence chronic allergic conditions, *87*
Migraine, aerosol ergotamine tartrate in treatment, *15*
Milk, precipitins to, as indicator of clinical hypersensitivity syndrome, *8*
protein, antigenicity in prepared formulas, *10*
Molds, diurnal variation in, for Cladosporium, *63*
Monkeys, neutralization of specific reagins in passively sensitized, *88*
Mucus, enzymatic dissolution in cystic fibrosis, *24*
Muscular dystrophy, autoimmune induction in mice and guinea pigs, *29*

N

Neonatal rabbits as donors of transferred lymph node cells, *9*
recipient rabbits, response to transferred rabbit lymph node cells, *9*
Neonates, immune response to bacteriophage, *45*
Nephrotic syndrome, mercury as cause, *21*
Neuritis, association with autoimmune disease, *11*
Nitrofurantoin, anaphylactoid reaction caused by, *64*

O

Ocular pressure, effect of long-term steroid therapy on, *47*
Oral desensitization to chlorpromazine, *69*
Oxyphenbutazone, agranulocytosis caused by, *79*

P

Passive cutaneous anaphylaxis, inability to demonstrate, in psoriasis, *36, 47*
in rats, role of skin proteolytic enzymes in, *95*
relation between molecular weight of antigen and ability to elicit, *11*
Penicillin allergy, hemagglutinin antibodies in, *83*
anaphylaxis following oral administration, *21*
antibody in maternal and cord bloods, *7*
antigenicity, *84*
hypersensitivity, use of penicillin paste to sterilize dental root canals as cause, *53*
sensitivity, basophil degranulation test in detection, *59*
Peptic ulcer, cortisone as cause, in dogs, *64*
Pernicious anemia, autoimmunity demonstrated in, *73*
Phagocytosis-promoting substance, presence in eosinophils, *76*
Phenindione, fatal sensitivity reaction to, *5*
Photoallergic reactions, antihistamines as cause, *52*
Photosensitivity due to chlorpropamide, *20*
Photosensitization, tetrachlorosalicylanilide as cause, *69*

Plasmin, significance in allergic diseases, *45*
Plastic food containers, toxic systemic reactions to, *73*
Pollens and spores, airborne, collection and washout by raindrops, *2*
washout by rainfall, *82*
Polyps, nasal, association with cystic fibrosis of pancreas, *96*
Polysaccharides, eosinotactic influences in experimental eosinophilia, *57*
Polyurethane industrial poisoning, *80*
Procainamide, lupus erythematosus caused by, *20*
Procaine hypersensitivity, cellular transfer, *68*
Propylthiouracil, immunoleukopenic reaction to, *72*
Prostatic fluid, antigens in, *77*
Prostatitis, eosinophilic granulomatous type, *80*
Pruritus, effect of atarax on, *20*
Psoriasis, immunologic factors in, *36*
mechanisms in, *50*
lack of passive cutaneous anaphylaxis in, *47*
Pulmonary emphysema, primary, in young adults, *34*
Purpura, sulfamethoxypyridazine as cause, *85*

Q

Quibron, bronchial asthma treated with, *18*

R

Ragweed, antibodies, various methods for measuring serum titers, *13*
antigen, iodine labeled, binding by human ragweed serum, *27*
comparison of hemagglutinating, blocking, and precipitating antibodies to, *10*
spontaneous canine hypersensitivity to, *74*
Reagin, inactivation by thiols, *78*
neutralization in passively sensitized monkeys, *88*
Refractoriness, immunologic, in adult guinea pigs, *77*
Repository emulsion, release of I^{131} from saline and vitellinic injection sites, *87*
Respiratory acidosis, effect of O_2 on, *6*
thrust, aid in physical diagnosis, *50*
Rice, severe intestinal reaction following ingestion, *62*

S

Schwartzman reaction, ocular changes in, *42*
Scotchgard, contact dermatitis from, *70*
Serotonin, use of inhibitor to influence chronic allergic states, *87*
Serum chloride fluctuation following anaphylaxis and histamine shock, *46*
proteins, rates of synthesis in, in infants, *28*
Skin, antigens common with blood platelets, *43*
graft rejections, following previous sensitization with "specific" blood platelets, *43*
homograft, demonstration of common antigen between skin and platelets by means of, *43*
proteolytic enzymes, in normal rats and rats submitted to passive cutaneous anaphylaxis, *95*
reactions with extracts of schistosoma, *48*
window, tissue eosinophilia demonstrated by means of, *38*
Spleen cells, adjuvant effect in guinea pig sensitization, *8*
histologic changes in anaphylaxis, *75*
Spores and pollens, airborne, collection and washout by raindrops, *2*
Staphylococcus infections secondary to occlusive steroid therapy in eczema, *71*
Status asthmaticus, acid-base balance, important factor in, *82*
Steroid aerosol therapy in chronic bronchial asthma, *66*
Steroids, cataracts produced from treatment with, *96*
influence on growth in asthmatics, *66*
influence on ocular pressure, *47*
Sulfamethizole, meningitis and pancreatitis caused by, *37*
Sulfamethoxypyridazine, thrombocytopenic purpura due to, *85*

T

Tandearil, ineffectiveness in treatment of asthma, *3*
Tanned-cell hemagglutination test, use in autoimmune thyroid disease, *30*
Testosterone, effect on incidence of asthma, *67*
Tetanus immunization with human immune globulin, *76*
toxoid, antibody response following booster dose of tetanus toxoid, *2*
Tetrachlorosalicylanilide, photosensitization by, *69*
Tetracycline, degraded, reversible Fanconi syndrome caused by, *64*
Thiamine hydrochloride, anaphylactoid reaction from, *73*
Thiols, inactivation of reagins by, *78*
Thrombocytes, intravascular antigen-antibody reaction, *75*
Thrombocytopenic purpura, toluene di-isocyanate (T.D.I.) as cause, *71*
Thymectomy, delayed hypersensitivity influenced by, *29*
in mouse, suppression of antibody production by, *28, 75*
Thyroid disease, autoimmunity reactions in, *30*
Tic douloureux, hydrochloric acid, antihistamines, and histamine desensitization in treatment, *32*

Toluene di-isocyanate (T.D.I.), as cause of asthma and thrombocytopenic purpura, *71*
industrial exposure as cause of sinusitis and/or asthma-like attacks, *80*
Topical corticosteroid therapy, complications following use, *71*
Trachea and bronchi, activity in experimental asthma, *83*
Transfer of rabbit lymph node cells to neonatal recipient rabbits, *9*
Triamcinolone lotion, effectiveness in various concentrations, *40*
Tropical eosinophilia, report of case, *15*

U

Ulcerative colitis, hypersensitivity factors in, *36*
Urticaria, acetylene welding as cause, *83*
basophilic leukopenia in, *50*
clinical studies in, *71*
and eczema, histamine liberator 48/80 effect on skin in, *4*
physical, basophil response in, *39*

V

Vaginal trichomonads, intracutaneous test for, *32*
Viral respiratory tract infections, role of allergy in, *18*
Vitamin B_1 levels following anaphylactic challenge, *40*

W

Wassermann test, false-positives and autoimmune disease, *26*
